PATIENT ENGAGEMENT

PE

Using our proprietary system, we engage patients, performing a Health Risk Assessment (HRA). This enables us to create personalized care plans, ensuring compliance with mandated care and significantly improving patient engagement (+35-40% initially, 80% over time)

Our Electronic and Live patient engagement increases attribution to your patients to your practice while determining which patients urgently need to be seen in your office. We can also increase your performance with Annual Wellness Visits (AWVs), Chronic Care Management (CCM), Remote Patient Monitoring (RPM), Behavioral Health Integration (BHI), and Transitional Care Management (TCM).

R

REVENUE

We begin with a free report and analysis, providing valuable insights into potential areas of improvement and growth opportunities. Our services will generate a net profit of up to 30% without increasing staff, requiring any training, compliance, certification or technology integrations. We will help you achieve significant operational and increased profits within 30 days through our electronic and live patient engagement; using our quick launch approach.

C

COMPLIANCE

We help bring higher Compliance Levels by performing required quality and service measures covering up to 46 touch points, all under the CMS Mandated Standards of Care for traditional Medicare beneficiaries. We also help you to increase compliance levels with your Medicare Advantage and ACO requirements while improving your MIPS, HEDIS, CAHPS, HOS and Star ratings.
